

Model 168

ments Low Differential Pressure Transducer

Model 168 series are low range differential pressure transducers and transmitters with NEMA 4 (IP-65) rated aluminum enclosures. They are very rugged and very reliable, good for many industrial applications.

The pressure range covers from 0.1"WC to 100"WC, unidirectional or bidirectional. The output can be 3-wire 0 to 5V, 0 to 10V, or 2-wire 4 to 20 mA, fully protected against short circuit and incorrect wiring. In the voltage version, the output can go down to true zero. The units are temperature compensated. The accuracy can be 1.0%, 0.4% or 0.25% at room temperature.

The patented stainless steel sensor provides good corrosion resistance, excellent performance and long term stability.

Our unique production setup can also make special pressure range (e.g. -0.5"WC to +3.5"WC) to meet special applications.

Model 168 Specifications

Performance Data	Standard	Optional	Optional
Accuracy* (at room temp)	± 1.0%FS	± 0.4%FS	± 0.25%FS
Non-Linearity (BFSL)	± 0.97%FS	± 0.33%FS	± 0.20%FS
Hysteresis	± 0.20%FS	± 0.20%FS	± 0.10%FS
Non-Repeatability	± 0.10%FS	± 0.10%FS	± 0.10%FS

Thermal Effects

Installation

Compensated Range 0 to 185° F (-18 to 85° C) Zero/Span Shift <0.028%FS/ $^{\circ}$ F (<0.05%FS/ $^{\circ}$ C)

Maximum Line Pressure 15PSI(100kPa)

Overpressure 15PSI(100kPa) in Positive or Negative Direction for all Ranges.

Warm-up shift $\pm 0.1\%$ FS

Position Effect Each unit is calibrated in the vertical position. For best accuracy, adjust

zero of the unit if it is mounted in other position. It is not necessary to

adjust the sensitivity.

 * RSS of Non–Linearity, Hysteresis, and Non–Repeatability.

Environmental Data and Physical Description

Operating Temperature 0 to 185° F (-18 to 85° C) Storage Temperature -65 to 220° F (-54 to 105° C)

Electrical Termination Pluggable Terminal Block with PG-9 or PG-7 Strain Relief Pressure Fittings 3/16" O.D. barbed brass for 1/8" I.D. push-on tubing(standard).

8mm O.D. barbed brass(optional).

Output Adjustment Accessible Inside of Enclosure.

Pressure Media Typically air or similar non-conducting gases.

Enclosure Die-cast aluminum.
Protection Rating NEMA 4/IP65
Weight 11.5OZ/330g

There are two 0.165 inch dia. mounting holes inside the enclosure. Two M3 X 6 pan head screws with spring washers are included in the box. Outlines see diagram 1. Zinc plated steel mounting plate with tabs is

optional.

Applications:

- Power Plant Air Flow Monitor and Control
- Clean Room and Fume Hood Control
- Duct Static Pressure

 Measurement
- Draft Control
- HVAC and VAV Control
- Furnace air flow Control

Features

- Up to 15 PSI Overpressure on All Ranges
- Miswiring Full Protection
- Unsymmetrical Bidrectional Pressure Ranges
- True Zero Output for Voltage Unit
- Meets (€ Conformance Standards
- Pressure Ranges as Low as 10Pa only!

Model 168 Specifications

Electrical Data (Voltage)

Circuit 3–Wire (+EXC, -EXC, OUTPUT), Protected from Miswiring

Excitation 16–32VDC

Output 0-5VDC, 0-10VDC

Output Impedance ≤5.0 OHMS

- * Calibrate with a 50K OHM load, operable with a load greater than 5K OHM for 0–5VDC output, greater than 10K OHM for 0–10VDC output...
- ** Zero output: factory set at ±25mV(0-5VDC), ±50mV(0-10VDC) Span output: factory set at ±25mV(0-5VDC), ±50mV(0-10VDC)

Electrical Data (Current)

Circuit 2–Wire (+EXC, -EXC) , Protected from Miswiring

Output 4–20mA

Bidirectional Output at Zero 12mA as standard

Excitation 16–32VDC (see diagram 2 for maximum loop resistance)

External Load 0-800 OHM

* Calibrated with a 250 OHM load and a 24VDC supply voltage.

** Zero output: factory set at ± 0.08 mA Span output: factory set at ± 0.08 mA

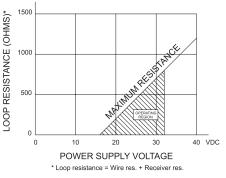

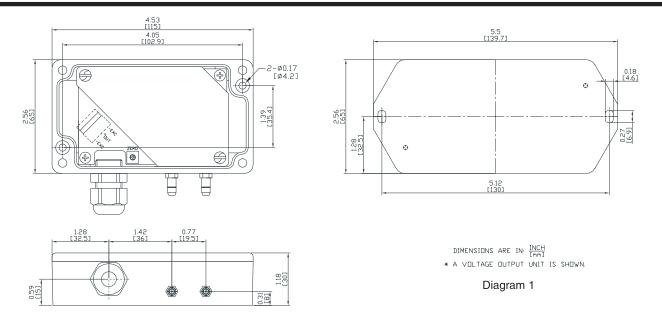

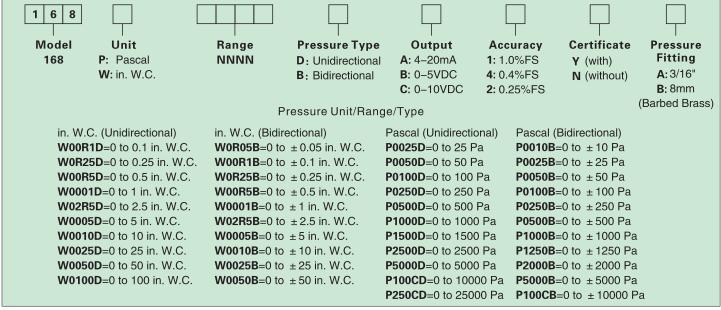

Diagram 2

Ordering Information

Code all blocks in table.

Example: 168W00R1DA1NA for 168 Transducer, 0~0.1 in. WC Range, Unidirectional, 4–20mA Output, 1% Accuracy, No Calibration Certificate, 3/16" Barbed Brass Pressure Fittings.
